SOLAR STREET LIGHT

The solar street light is used in many countries to effectively utilize the solar energy. The working of the solar street light is on the principle to convert the solar energy into usable form like electricity. They come in various shape and production capacity. We offer a great range of selection from the solar street light that have maximum efficiency and are highly durable.

LED BASED LIGHTING SYSTEM

Sai CabTech P. Limited

The solar lighting system consists of the solar cells, inverter and led lights. The model also contains the digital controller that increases the life span of the battery. The LED based solar lighting system is useful in providing the light to those locations where electricity is not available. They are used in many locations like street light, grounds, etc. to generate light from solar power.

CONSULTANT OF SOLAR PLANT

Sai CabTech P. Limited

The solar plant needs to be fixed properly in order to get maximum output generated from the solar panels. We are the top consultant of solar plant to help you install the plants in the proper location to get best amount of energy generation from them. These plants are offered in a number of shape and size according to the needs of the client.

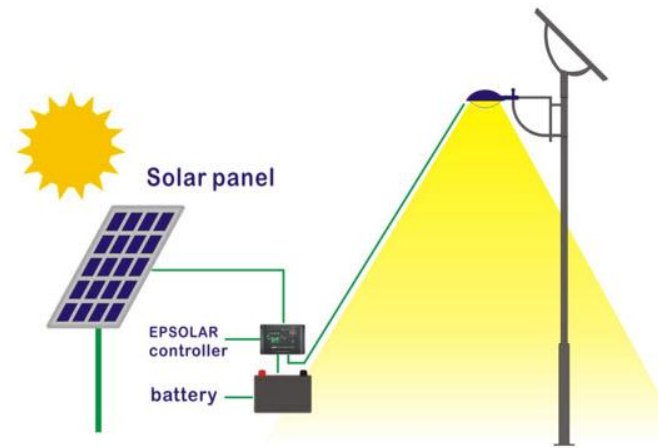

SOLAR STREET LIGHT WORKING

Sai CabTech P. Limited

The solar street light works on the principle to convert the solar energy into electricity that is used to operate various appliances like street light. The street light working is simple. The photovoltaic cells connected in it absorb the solar energy during the day and stores them into the battery. This energy is then converted into the electrical energy.

SOLAR POWER SYSTEM FOR ROOFTOP

Sai CabTech P. Limited

The solar power system can be installed in any location that is exposed to sunlight. One of the best locations is the rooftops. We provide the solar power system for rooftops that are made in different shape and size to suit the location. These systems we offer have the best efficiency in converting the solar energy into the electricity.
